

RRC ENVIRONMENTAL POLICY

As a Motorsport Event organizer and Motorsport services provider, MSI recognises that its activities, can cause impacts on the environment.

MSI commits to meet all environmental rules and regulations in the Region of Lazio and to protect our environment through management practices and decisions.

MSI will prevent pollution by trying to minimize waste generation and resource consumption.

MSI will establish and evaluate achievable environmental performance goals to ensure continual improvement of its Policy

We aim to apply our environmental management system to all of our activities and operations which have a significant impact on the environment.

We will monitor the progress of our business against the standards we define and the objectives we set.

Specific objectives will be defined to reduce the environmental impact of our business in the areas of reduction in our CO2 output, and waste minimisation.

Following the successful strategy of other automotive company we want to meet our environmental objectives in the following way:

- Employees: actively educate our workforce so that they understand their responsibilities for minimising their environmental impact in their day-to-day activities in order to assist the MSI to achieve its environmental objectives and targets.
- Team participating at the event: MSI will continually push the day to day process of the teams attending the events so that they will become more efficient.
- Contractors and Suppliers: Contractors and Suppliers will be asked to sign agreements which state MSI expectation in terms of, safety and environmental practice.

SERVICE PARK WASTE MANAGEMENT RULES:

Let's **Go Green** Together
